

KENNISGEWING - 74/2023

ADVIESNOTA - WATER

Die konstante reën die afgelope 30 dae binne die munisipale grense van Kannaland Munisipaliteit kan daartoe lei dat drinkwater soms 'n troebelheid toon, wat 'n toename in troebelheid is, geskep deur gesuspendeerde materiaal in afloopwater na ons rouwater opgaardamme. Die toename in troebelheid beïnvloed die doeltreffendheid van die onderskeie Waterbehandelingswerke. Die munisipaliteit monitor hierdie situasie voortdurend en aanpassings word gemaak soos die situasie verander. Die toename in troebelheid (indien dit gebeur) hou geen direkte gevaar in nie, maar kan die doeltreffendheid van ons chloronering beïnvloed. Dit kan 'n spesiale risiko inhou vir mense met erg gekompromitteerde immuunstelsels, sommige bejaardes en babas. Inwoners word versoek om water te kook indien die water troebel toon. Hierdie kennisgewing sal binne 7 dae hersien word.

Moontlike waterstelsels wat geaffekteer word:

Calitzdorp Watervoorsieningstelsel

Zoar Watervoorsieningstelsel

Van Wyksdorp Watervoorsieningstelsel

KENNISGEWING - 75/2023

ADVIESNOTA - RIOOL

Die konstante reën die afgelope 30 dae binne die munisipale grense van Kannaland Munisipaliteit kan daartoe lei dat septiese tenks en noodriooldamme vinniger as normaalweg vol raak. Inwoners met "french drains" moet ekstra maatreëls tref om besoedeling te vermy. Inwoners met septiese tenks word versoek om meer gereelde monitering van hul septiese tenke uit te voer. Dit sal die munisipaliteit help om die septiese tenks leeg te maak wanneer die vlak 75% van die totale tenkvolume bereik, wat die risiko van moontlike oorloop verminder.

Moontlike Rioolstelsels geaffekteer:

Calitzdorp Rioolstelsel

Amalienstein Nedersetting

Sekere landelike areas

KENNISGEWING - 76/2023

ADVIESNOTA – MUNISIPALE PAAIE

Kannaland Munisipaliteit is tans in die proses van jaareindprosedures. Dit het daartoe gelei dat SCM-prosesse vir 'n tydperk van ongeveer twee weke tydelik vertraag word. Die konstante reën die afgelope 30 dae het tot bykomende slaggate gelei, met bestaande slaggate wat groter geword het. Die munisipaliteit is besig met 'n padinstandhoudingsprogram, wat vanaf 1 Augustus 2023 geïmplementeer sal word.

Die beplande gefaseerde benadering deur die munisipaliteit sal binne 14 dae vanaf die plasing van hierdie advieskennisgewing op die munisipale webtuiste geplaas word.

DATUM

NOTICE - 74/2023

ADVISORY NOTICE ON WATER

The constant rain the past 30 days within the municipal boundaries of Kannaland Municipality may result in drinking water at times showing a cloudiness, which is an increase in turbidity, created by suspended materials in runoff water into our raw water storage dams. The increase in turbidity will affect the efficiency of the respective Water Treatment Works. The municipality is constantly monitoring this situation and adjustments are made as the situation arise. The increase in turbidity (if it happens) does not impose any direct danger but can affect the effectiveness of our chlorination. This may pose a special risk to people with severely compromised immune systems, some elderly people and infants. Residents are requested to boil water if the water shows cloudiness. This notice will be reviewed within 7 days.

Possible Water Systems Affected:

Calitzdorp Water Supply System
Zoar Water Supply System
Van Wyksdorp Water Supply System

NOTICE - 75/2023

ADVISORY NOTICE ON SEWERAGE

The constant rain the past 30 days within the municipal boundaries of Kannaland Municipality may result in conservancy tanks and emergency ponds filling up faster than normal. Residents with french drains must also take extra precaution to mitigate pollution. Residents with conservancy tanks are requested to perform more regular monitoring of their conservancy tanks. This will assist the municipality in emptying the conservancy tanks when the level reach 75% of the total tank volume, decreasing the risk of possible overflowing.

Possible Sanitation Schemes Affected:

Calitzdorp Sanitation System
Amalienstein Settlement
Some rural areas

NOTICE - 76/2023

ADVISORY NOTICE ON MUNICIPAL ROADS

Kannaland Municipality is currently in the process of year-end procedures. This result in SCM processes temporary delayed for a period of approximately two weeks. The constant rains the past 30 days resulted in additional potholes, with existing potholes expanding in size. The municipality is busy with a road maintenance programme, which will be implemented from 1 August 2023.

The planned phased approach by the municipality will be placed on the municipal facebook page within 14 days from the placement of this advisory notice.
