Notice No. 55/2025

BOIL WATER NOTICE

High counts of E. coli found in the water supply of Ladismith, Caltizdorp and Zoar

BOIL YOUR WATER BEFORE USING

Bring tap water to a rolling boil, boil for one minute, and cool before using.

What happened?

Our water is routinely monitored for various parameters which include parameters such as E. coli and coliforms. Water samples results received on 15 May 2025 showed E. coli levels outside of the parameters set in national standards, SANS 241-1:2015. The Water Incident Management Protocol as resolved by Council, inform the relevant steps that must be taken, inclusive of a public notice informing the public of the risks. Because of the elevated levels of E. coli, there is an increase chance that your drinking water may contain harmful microbes.

What is being done?

Corrective actions:

- Community informed of water results after testing. Boil notice issued.
- Main water supply line rinsed and thoroughly inspected for defects.
- Purification chemicals such as chlorine adjusted based on hourly parameter readings.

It is recommended that you boil the drinking water for the next 3 days and 0 hours until the problem is resolved. You will be informed when our water quality has increased to national standards.

For more information, contact:
Mr. Jenovaan Booysen at 028 551 8000

Please share this information with other people who drink this water, especially anyone who may not get this notice directly.

Date Distributed: 15 May 2025

Yours sincerely,

ADV DILLO SEREO
MUNICIPAL MANAGER

Notice No. 55/2025

KENNISGEWING — KOOK VAN WATER

Hoë E. coli vlakke gevind in Calitzdorp Watervoorsieningstelsel

KOOK WATER VOOR GEBRUIK

Bring kraanwater tot kookpunt, kook vir een minuut en koel af voor gebruik.

Wat het gebeur?

Ons water word gereeld genlont vir verskeie parameters wat parameters soos E. coli en koliVorme insluit. Resultate van watermonsters wat op 15 Mei 2025 ontvang is, het E. Coli-Vlakke getoon buite die parameters gestel in nasionale standarde, SANS 241-1:2015. Die Watervoorsieningbestuursprotokol soos deur die Raad opgelos, lig die relevante stappe in wat geneem moet word, insluitend 'n openbare kennisgewing wat die publiek van die risiko's inlig. As gevolg van die verhoogde vlakke Van E. coli, is daar 'n groter kans dat jou drinkwater skadelike mikrobies kan bevat.

Wat word gedoen?

Regstellende aksies:

- Gemeenskap in kennis gestel van water resultate na toetsing. Kook kennisgewing uitgereik.
- Hoof toevoer waterlyn gespoel en deeglik vir defekte geïnspekteer.
- Suiwerings chemikalieë soos chloor aangepas op grond van uurlikse lesings.

Dit word aanbeveel dat jy die drinkwater vir die volgende 3 dae en 0 uur kook totdat die probleem opgelos is. U sal ingelig word wanneer ons watergehalte tot nasionale standarde toegeneem het.

Vir meer inligting, kontak:

Mnr Jenovaan Booysen by 028 551 8000

Deel asseblief hierdie inligting met ander mense wat hierdie water drink, veral enigiemand wat dalk nie hierdie kennisgewing direk kry nie.

Datum versprei: 15 Mei 2025

Die uwe,

.....
